

Java instanceof Keyword

[< Java Keywords](#)

Example

Check whether an object is an instance of a specific class:

```
public class Main {  
    public static void main(String[] args) {  
        Main myObj = new Main();  
        System.out.println(myObj instanceof Main); // returns true  
    }  
}
```

[Try it Yourself »](#)

Definition and Usage

The **instanceof** keyword checks whether an object is an instance of a specific class or an interface.

The instanceof keyword compares the instance with type. The return value is either **true** or **false**.
