What is C?

C is a general-purpose programming language created by Dennis Ritchie at the Bell Laboratories in 1972.

It is a very popular language, despite being old.

C is strongly associated with UNIX, as it was developed to write the UNIX operating system.

Why Learn C?

- It is one of the most popular programming language in the world
- If you know C, you will have no problem learning other popular programming languages such as Java, Python, C++, C#, etc, as the syntax is similar
- C is very fast, compared to other programming languages, like <u>Java</u> and <u>Python</u>
- C is very versatile; it can be used in both applications and technologies

Difference between C and C++

 <u>C++</u> was developed as an extension of C, and both languages have almost the same syntax

• The main difference between C and C++ is that C++ support classes and objects, while C does not
